The firm will not consider applications who are not more than 2 years removed from law school and/or do not have private practice experience.

All positions offer an opportunity to gain substantial hands-on experience in sophisticated commercial matters with the firm's top-tier clientele. Significantly above market compensation is paid to top performers. Salaries are commensurate with experience and accompanied by substantial bonus opportunities. We have designed a system whereby attorneys are able to control their own compensation destiny and each year top performers in our system earn far more than their industry peers. The firm offers a generous benefit package for employees as well as a 401(k) with profit sharing opportunities. Additional perk benefits on par with any employer in Jacksonville.
